

A detailed architectural rendering of a modern building. The structure features a prominent brick facade on the left side, transitioning into a large glass curtain wall on the right. The building is shown from a low-angle perspective, emphasizing its height. The interior of the glass-walled section is visible, showing some furniture and structural elements. The overall style is clean and professional, typical of architectural visualization.

This architectural elevation drawing shows the side profile of the building. It features a long, low structure with a series of large, multi-paned glass windows. The windows are framed by dark, possibly metal, mullions. Between the window sections, there are vertical elements of brickwork. The interior of the building is visible through the glass, showing various levels, including a mezzanine with a railing, and furniture such as tables and chairs. The building is set on a flat, light-colored ground plane.

This architectural section drawing illustrates a building's interior layout. On the left, a staircase with a simple railing leads up to a platform. Above the platform, a series of vertical elements, possibly columns or a screen, are shown. To the right of the staircase is a small room with a dashed line indicating a door or partition. Further right is a larger room with a desk and two chairs, suggesting a workspace or study area. A large window on the far right allows natural light into the space. The drawing uses clean lines and shading to represent the building's structure and furniture.
